

## New Raven™ Institutional Sprinklers & Discontinuation of Model TFP-MAX Institutional Sprinklers

Dear Friends and Valued Customers:

Tyco Fire Suppression & Building Products would like to announce that the Raven™ Institutional Sprinklers are now available for sale. The new 5.6 K-Factor, quick response sprinklers are ideal for use in correctional, detention, mental healthcare and commercial facilities. RAVEN pendent and sidewall sprinklers are designed to be more tamper resistant. The unobtrusive, flush design conceals all the operating parts, eliminating the opportunity of attracting unwanted attention and providing added protection.

RAVEN institutional sprinklers are UL and C-UL listed. The sprinklers are available in standard and extended coverage, up to 16' x 16', and come in white and chrome finishes.

Effective immediately, TFP-MAX, quick response series of Institutional sprinklers will only be available until inventory has been depleted. Raven Institutional Sprinklers can be used as a replacement for the TFP-MAX. The following parts will be affected:
